Professional Summary

Computer Science undergraduate and Full-Stack Developer experienced in building modern web applications using Next.js, TypeScript, Node.js, and REST APIs. Skilled in PostgreSQL, Prisma, MongoDB, Redis, authentication, WebSockets, payment systems, and GenAI/LLM application development.

Experience

Web Developer AWH Bharat

July 2026 – Present

- Developed and maintained backend services for ticket-booking and e-commerce platforms using Node.js, Express.js, Firebase/Firestore, and Razorpay.
- Implemented Razorpay payment workflows (order creation, verification, failure handling, webhooks, coupon validation) with Firebase-backed ticketing features.
- Built automated API test suites with Jest and Supertest using Firebase Admin mocking, reaching 98.5% statement, 95% function, and 85% branch coverage.
- Migrated event modules to a reusable, configuration-driven React architecture supporting configurable forms, themes, and event data.

Research Intern MANIT Bhopal

June 2026 – July 2026

- Researched Human Activity Recognition (HAR) and fall detection using Transformer-based architectures on smartphone and wearable sensor time-series data.
- Evaluated standard Transformers against PatchTST across UCI HAR, SisFall, and wearable HAR datasets using five-fold cross-validation.
- Assessed models on accuracy, precision, recall, F1-score, ROC-AUC, and confusion matrices; Transformer variants reached 96.6–96.7% accuracy with near-perfect class-level AUC on the wearable HAR benchmark.

Projects

PostBoy

Next.js, TypeScript, WebSockets, Prisma, PostgreSQL, Better Auth

- Built a full-stack API testing platform supporting REST requests, dynamic headers/params, Monaco-based request editing, and response inspection with latency and size analysis.
- Developed a real-time WebSocket client with live sent/received message tracking, timestamps, and persistent message storage.
- Implemented authentication, workspace collaboration, team invitations, and persistent request/response management.

AI Form Builder

Next.js 15, React 19, TypeScript, Node.js, PostgreSQL, Prisma, Redis

- Developed a multi-tenant SaaS platform for creating, publishing, and analyzing forms using a React Flow-based visual drag-and-drop builder.
- Implemented AI-powered form generation, conditional logic, real-time collaboration, and role-based workspace management.
- Built scalable background processing with Redis/BullMQ and real-time communication using Socket.IO, with Dockerized deployment.

LeetCode Platform

Next.js, TypeScript, Prisma, PostgreSQL, Clerk, Judge0

- Built a full-stack coding platform with problem creation, submissions, and automated code execution via Judge0.
- Implemented Clerk authentication, GitHub OAuth, user onboarding, and role-based access for administrative problem management.
- Developed search/filtering, submission history, user statistics, playlists, and profile management using Prisma and PostgreSQL.

Technical Skills

Languages:	JavaScript (ES6+), TypeScript, Python, Java
Frontend:	React.js, Next.js, HTML5, CSS3, Tailwind CSS
Backend:	Node.js, Express.js, REST APIs, WebSockets
Databases:	PostgreSQL, MongoDB, Redis, Prisma ORM
AI/GenAI:	LLM APIs, OpenRouter, LangChain, Hugging Face, RAG, Prompt Engineering
DevOps/Tools:	Docker, Git, GitHub, Postman, GitHub Actions, VS Code

Education

School of Information Technology, RGPV – Bhopal, India

2024 – Present

B.Tech in Computer Science and Business Systems | GPA: **7.2/10.0**

Kendriya Vidyalaya – Bhopal, India

2024

Class XII (CBSE) | **84.8%**

Achievements & Certifications

- Solved 200+ DSA problems across multiple coding platforms.
- Selected for Research Internship at MANIT Bhopal (CEPDSM).
- Completed *Generative AI Course with LangChain & Hugging Face* – Udemy (RAG, LangChain, Hugging Face, GenAI apps).
